air toxic risk assessment pdf

Volume 1 discusses the overall air toxics risk assessment process and the basic technical tools needed to perform these analyses. The manual, which covers both human health and ecological analysis, also provides a basic overview of risk management and communication.

The Office of Environmental Health Hazard Assessment (OEHHA) is required to develop guidelines for conducting health risk assessments under the Air Toxics Hot Spots Program (Health and Safety Code Section 44360(b)(2)).

health risk assessments in compliance with OAR chapter 340, division 245. A risk assessment can be a screening risk assessment (Levels 1 and 2), a simple risk assessment (Level 3), or a complex risk assessment (Level 4). Risk screening values are based on both short-term and long-term exposure, and are established in rule.

Residing within the Division of Air Pollution Control (DAPC) and under the Air Monitoring Section is the Air Toxics Monitoring Group (ATMG), which is responsible for all ambient air toxic monitoring tasks, basically monitoring for those compounds that are not covered by the criteria pollutant monitoring program. The criteria pollutants are: sulfur dioxide; nitrogen dioxide; carbon monoxide; ozone; lead; and particulate matter less than 10 microns or (PM10).
