So, I get two or three emails a day, all basically asking the same thing: "Where can I learn about electronics?" In general, most of these people have seen some of my projects and want to be able to build similar things.

Mobility I'm happy with the compactness of the battery power pack. Housing 85Ah at 12VDC for 1KWh of power, a 2000W power inverter, a charge controller, a voltage meter, an LED light bar, multiple outlets with circuit breakers, as well as all cables in such a small space is extremely convenient for portability.

Do it yourself CNC projects are popping up everywhere and we decided that we wanted to contribute to the growth.. Here are a few of our design goals: Modular Design " We wanted to do more than just keep cost down. We wanted things to be reusable and up-gradable. Here is the schematic of the whole setup and below is the Arduino sketch. Please note that the resistors needed to be at least 1/4W rated but I did not have the 22 Ohm needed for the project and used 1/8W ones.

I do not like the end-contacts that close to reporting limits. Indeed, if a wire disconnects, cut or is broken: bye-bye safety! The best protection is achieved by linking the two switches "normally closed" which cause the stop opening the circuit.
