Activities of daily living (ADLs or ADL) is a term used in healthcare to refer to people's daily self care activities. The concept of ADLs was originally proposed in the 1950s by Sidney Katz and his team at the Benjamin Rose Hospital in Cleveland, OH and has been added to and refined by a variety of researchers since that time. Health professionals often use a person's ability or inability to ...

2In describing the rolling criteria used in the construction of what Dr Strauss described as the "scenario that assumes the ability to roll, which was the most optimistic of the three" he used the expression consistently only once and that in regard to the ability to roll from front to back but not vice versa. However, it is highly improbable that the consistency criterium applied only to ...
