

chemistry of solids pdf

Because a book of this size could not cover all topics in solid state chemistry, we have chosen to concentrate on structures and bonding in solids, and on the interplay between crystal and electronic structure in determining their properties.

Types of Solids The solids are of two types : Crystalline solids and amorphous solids. Distinction Between Crystalline and Amorphous Solids S.No Crystalline solid Amorphous solids 1 These have definite and regular arrangement of the constituent particles in space. These doesn't have any regular arrangement of the constituent particles in space. 2 These are true solids.
