For more than twenty years Parker Fabrication, Inc has been producing high quality, cost effective, components and fabricated assemblies for customers that vary from Fortune 100 International OEM manufacturers to the local consumer.

Parker Fabrication, Inc.

Our Engineering Services. We cater for a wide range of fabrication requirements. We have a skilled team producing components for a high quality office furniture manufacturer, used throughout the UK and Ireland.

The Independent metal fabrication - DS Engineering LTD

Metal fabrication is the building of metal structures by cutting, bending, and assembling processes.. It is a value added process that involves the creation of machines, parts, and structures from various raw materials. A fabrication shop will bid on a job, usually based on the engineering drawings, and if awarded the contract will build the product.. Large fab shops employ a multitude of ...

Clisby is a broad based engineering company and an associate of a larger group of companies with

engineering fabrication activities in Malaysia and Indonesia supplying products and services throughout SE Asia, all compliant to best practice and the highest international standards.

Clisby Engineering

Within industry, piping is a system of pipes used to convey fluids (liquids and gases) from one location to another. The engineering discipline of piping design studies the efficient transport of fluid. Industrial process piping (and accompanying in-line components) can be manufactured from wood, fiberglass, glass, steel, aluminum, plastic, copper, and concrete.

1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...
