Thermal Science - Online First. Online First contains the manuscripts of articles that have been accepted for publication but have not yet appeared in the paper journal.

Thermal Science - scientific journal [Online First]

Thermal spraying techniques are coating processes in which melted (or heated) materials are sprayed onto a surface. The "feedstock" (coating precursor) is heated by electrical (plasma or arc) or chemical means (combustion flame). Thermal spraying can provide thick coatings (approx. thickness range is 20 microns to several mm, depending on the process and feedstock), over a large area at high ...

Thermal spraying - Wikipedia

This paper summarizes the basic properties of ceramic materials for thermal barrier coatings. Ceramics, in contrast to metals, are often more resistant to oxidation, corrosion and wear, as well as being better thermal insulators.

Cold Spray (CS) (formerly gas dynamic cold spray) is a coating deposition method. Solid powders (1 to 50 micrometers in diameter) are accelerated in a supersonic gas jet to velocities up to 500-1000 m/s. During impact with the substrate, particles undergo plastic deformation and adhere to the surface. To achieve a uniform thickness the spraying nozzle is scanned along the substrate.

Gas dynamic cold spray - Wikipedia

JNN is a multidisciplinary peer-reviewed journal covering fundamental and applied research in all disciplines of science, engineering and medicine.

Journal of Nanoscience and Nanotechnology

American Journal of Nanosciences (AJN) is published quarterly, it accepts papers in the field of nanosciences, defining nanophysics as the study of physical and chemical phenomena using physical and chemical methods and concepts. The journal presents original papers, reviews and letters. The primary goal of this journal is to advance the understanding of nano material's structure and function ...
