### **Maintaining portable electrical equipment in low-risk**

Electronic test equipment is used to create signals and capture responses from electronic devices under test (DUTs). In this way, the proper operation of the DUT can be proven or faults in the device can be traced. Use of electronic test equipment is essential to any serious work on electronics systems.

A test light, test lamp, voltage tester, or mains tester is a piece of electronic test equipment used to determine the presence of electricity in a piece of equipment under test. A test light is simpler and less costly than a measuring instrument such as a multimeter, and often suffices for checking for the presence of voltage on a conductor.

What is Cataract Surgery? Cataract surgery is the removal of the lens inside the eye after it has become cloudy due to aging, an eye injury or other causes. In most cases, the cataract surgeon replaces the cloudy natural lens with an artificial lens implant (also called an intraocular lens, or IOL) to restore vision and eliminate the need for thick glasses after surgery.
