manual_en code blocks | Command Line Interface | Library

In Markdown output, code blocks with classes `haskell` and `literate` will be rendered using bird tracks, and block quotations will be indented one space, so they will not be treated as Haskell code. In addition, headers will be rendered setext-style (with underlines) rather than ATX-style (with `##` characters).

Pandoc - Pandoc User's Guide

As shown, Code Blocks will create a directory called First Program (Project Title) and returns your selected directory in Folder to create project in. Inside that directory will be the Project filename (First Program) and a resulting filename, which contains a Code Block Project file (.cbp) named First Program.cbp.
