In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...

Mathematical economics is the application of mathematical methods to represent theories and analyze problems in economics. By convention, these applied methods are beyond simple geometry, such as differential and integral calculus, difference and differential equations, matrix algebra, mathematical programming, and other computational methods. ...

I have a bibtex database of optimization references (900K) available online. These are mostly interior point references. A searchable version of this bibliography is also available. I also have an unorganized list of announcements of computational packages that are available for solving a variety of problems. This page is not updated often enough, so some of the links are no longer functional.

Welcome. The Computing + Mathematical Sciences (CMS) Department is nestled in the heart of Pasadena on the beautiful Caltech campus. CMS is home to outstanding students and researchers who share a passion for science and engineering, as well as a drive to investigate the most challenging, fundamental problems in computation and information.

The Classical Spin-Rotation Coupling and the Kinematic Origin of Inertia. Authors: Louai Hassan Elzein Bashier Comments: 30 Pages. This paper is prepared to show that a rigid body which accelerates curvilinearly from its center of mass relative to a fixed point must simultaneously accelerate angularly relative to its center of mass.
