There are two related definitions of entropy: the thermodynamic definition and the statistical mechanics definition. Historically, the classical thermodynamics definition developed first. In the classical thermodynamics viewpoint, the system is composed of very large numbers of constituents (atoms, molecules) and the state of the system is described by the average thermodynamic properties of ...

### Entropy - Wikipedia

Learn classical thermodynamics alongside statistical mechanics with this fresh approach to the subjects. Molecular and macroscopic principles are explained in an integrated, side-by-side manner to give students a deep, intuitive understanding of thermodynamics and equip them to tackle future research topics that focus on the nanoscale.

Relative lowering of vapor pressure. The vapor pressure of a liquid is the pressure of the vapor which is in equilibrium with that liquid. The vapor pressure of a solvent is lowered when a non-volatile solute is dissolved in it to form a solution.

### equipartition theorem - Wikipedia

La palabra "equipartición" significa "comparte por igual". El concepto original de la equipartición era que la energía cinética total de un sistema es compartida en partes iguales entre todas las partes independientes, en promedio, una vez que el sistema ha alcanzado el equilibrio térmico. La equipartición también hace predicciones cuantitativas de dichas energías.
