Orthotics (Greek: ὀρθοί, ἰατρεία, translit. ortho, lit. 'to straighten, to align') is a medical specialty that focuses on the design and application of orthoses. An orthosis (plural: orthoses) is "an externally applied device used to modify the structural and functional characteristics of the neuromuscular and skeletal system". An orthotist is the primary medical clinician responsible for the ...

Open Access journals are the major source of knowledge for young and aspiring generations who are keen in pursuing a career in sciences. This system provides easy access to networks of scientific journals. Authors that contribute their scholarly works to Open Access journals gain remarkable reputation as the research scholars explore these works extensively.

Free Access to Scientific Journals - Open Access Journals

The following list of job titles provides examples of jobs that may be available to graduates of the Bachelor of Exercise and Sport Science. Some of these jobs will depend on the amount and level of study undertaken, level of experience, the combination of other majors and electives studied, and some may require further study.

Bachelor of Exercise and Sport Science - The University of

Introduction. Myofascial release (MFR) has been described as an umbrella term for a wide variety of manual therapy techniques in which pressure is applied to muscle and fascia (McKenney et al., 2013). By extension, self-myofascial release (SMFR) is a type of MFR that is performed by the individual themselves rather than by a clinician, often using a tool.
