

quantification and syntactic theory pdf

Syntactic change is the evolution of the syntactic structure of a natural language.. Over time, syntactic change is the greatest modifier of a particular language. [citation needed] Massive changes " attributable either to creolization or to relexification " may occur both in syntax and in vocabulary.Syntactic change can also be purely language-internal, whether independent within the ...

In mathematics, model theory is the study of classes of mathematical structures (e.g. groups, fields, graphs, universes of set theory) from the perspective of mathematical logic.The objects of study are models of theories in a formal language.A set of sentences in a formal language is one of the components that form a theory.A model of a theory is a structure (e.g. an interpretation) that ...

Word meaning has played a somewhat marginal role in early contemporary philosophy of language, which was primarily concerned with the structural features of sentences and showed less interest in the format of lexical representations and in the nature of the word-level input to compositional processes.

Fig. 1. The robot reasons and acts in domestic interaction scenarios. The sources of information are

multi-modal dialogue (A) and perspective-aware monitoring of the environment and human activity (B). The robot must adapt on-line its behaviours by merging computed plans (C) with reactive control. The robot explicitly reasons on the fact that it is (or is not) observed by the human.

Artificial cognition for social human-robot interaction

Gaussian Processes and Kernel Methods Gaussian processes are non-parametric distributions useful for doing Bayesian inference and learning on unknown functions. They can be used for non-linear regression, time-series modelling, classification, and many other problems.
