A week is a time unit equal to seven days. It is the standard time period used for cycles of rest days in most parts of the world, mostly alongside – although not strictly part of – the Gregorian calendar.. The days of the week were named after the classical planets (derived from the astrological system of planetary hours) in the Roman era. In English, the names are Sunday, Monday, Tuesday ...

UY Scuti (BD-12 5055) is a red supergiant and pulsating variable star in the constellation Scutum. It is one of the largest known stars by radius, and is also one of the most luminous red supergiants. If placed at the center of the Solar System, UY Sct's photosphere would extend beyond the orbit of Jupiter, although new estimates on the distance suggest it has a much lower radius.
