

the b language and pdf

B is a programming language developed at Bell Labs circa 1969. It is the work of Ken Thompson with Dennis Ritchie. B was derived from BCPL, and its name may be a contraction of BCPL. Thompson's coworker Dennis Ritchie speculated that the name might be based on Bon, an earlier, but unrelated, programming language that Thompson designed for use on Multics. B was designed for recursive, non-numeric, machine-independent applications, such as system and language software.
